Lucas HAYWOOD

Vice President, Global Strategy, ONESTRUCTION Inc.

Founded in 2020, **ONESTRUCTION Inc.** develops and provides digital construction solutions and services including BIM modelling, system integration and custom software/AI development. ONESTRUCTION also provides "OpenAEC" a SaaS solution that empowers designers and asset owners to easily create and manage data-rich, open-standard BIM data that retains its value across the construction lifecycle. The company mission is to bridge the gap between construction and technology with the vision of being a "CONSTRUCTION × DATA" platformer that drives productive digital transformation by democratizing cutting edge technology, and empowering users with efficient and effective data-driven workflows for construction.

ONESTRUCTION

Hiroshi UEKI

*Head of Overseas Business Development,
SAKURA internet Inc.*

SAKURA internet Inc., founded in 1999, provides cloud computing services and operates data centers that support Japan's digital infrastructure. Guided by the vision of turning "what you want to do" into "what you can do," the company empowers individuals and organizations through the internet. SAKURA internet aims to build digital infrastructure that enriches society, enables flexible workstyles, and transforms challenges into opportunities for sustainable growth and innovation.
